Analysis steps

- 1) Utilisation of UIA World Boundaries feature geometry to join a dataset of GapMinder Foundation website to produce a map at the global extent
- 2) Utilisation the current count of COVID-19 cases in the United States, from the Center for Disease Control to demonstrate three methods of normalization of this data (normalization by area, population and equal area cartogram)
- 3) Utilization of Hexbins to create a descriptive summary of a region of interest.

1) Utilisation of UIA World Boundaries feature geometry to join a dataset of GapMinder Foundation website to produce a map at the global extent

- The analysis was focused on women BMI (kg/m²) in 1989

- BMI data was downloaded from:

<https://www.gapminder.org/data/>

- UIA World Boundaries feature was downloaded from:

https://hub.arcgis.com/datasets/252471276c9941729543be8789e06e12_0/geoservice

2a) Utilisation of the current count of COVID-19 cases in the United States with data normalization by states population

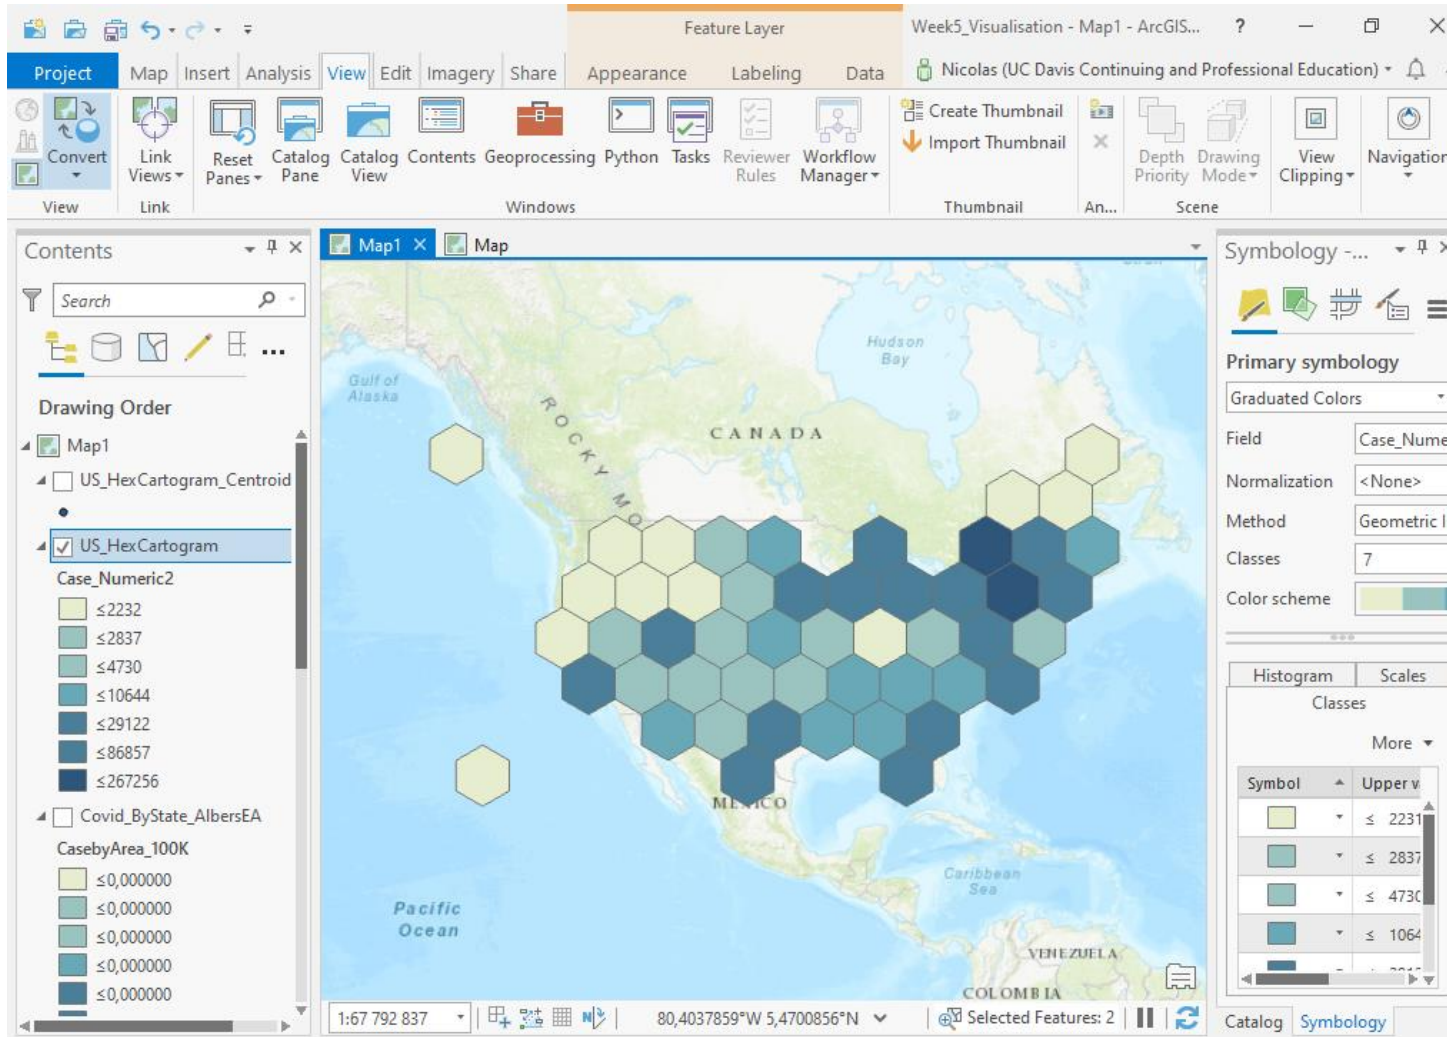

- Coordinate system: North America Albers Equal Area Conic
- COVID-19 cases count normalized by population per 100,000
- Color ramp of Geometric Interval with 7 classes

2b) Utilisation of the current count of COVID-19 cases in the United States with data normalization by states area

- Coordinate system: North America Albers Equal Area Conic
- COVID-19 cases count normalized by States area [sq meter]
- Color ramp of Geometric Interval with 7 classes

2c) Utilisation of the current count of COVID-19 cases in the United States with data normalization by equal area cartogram

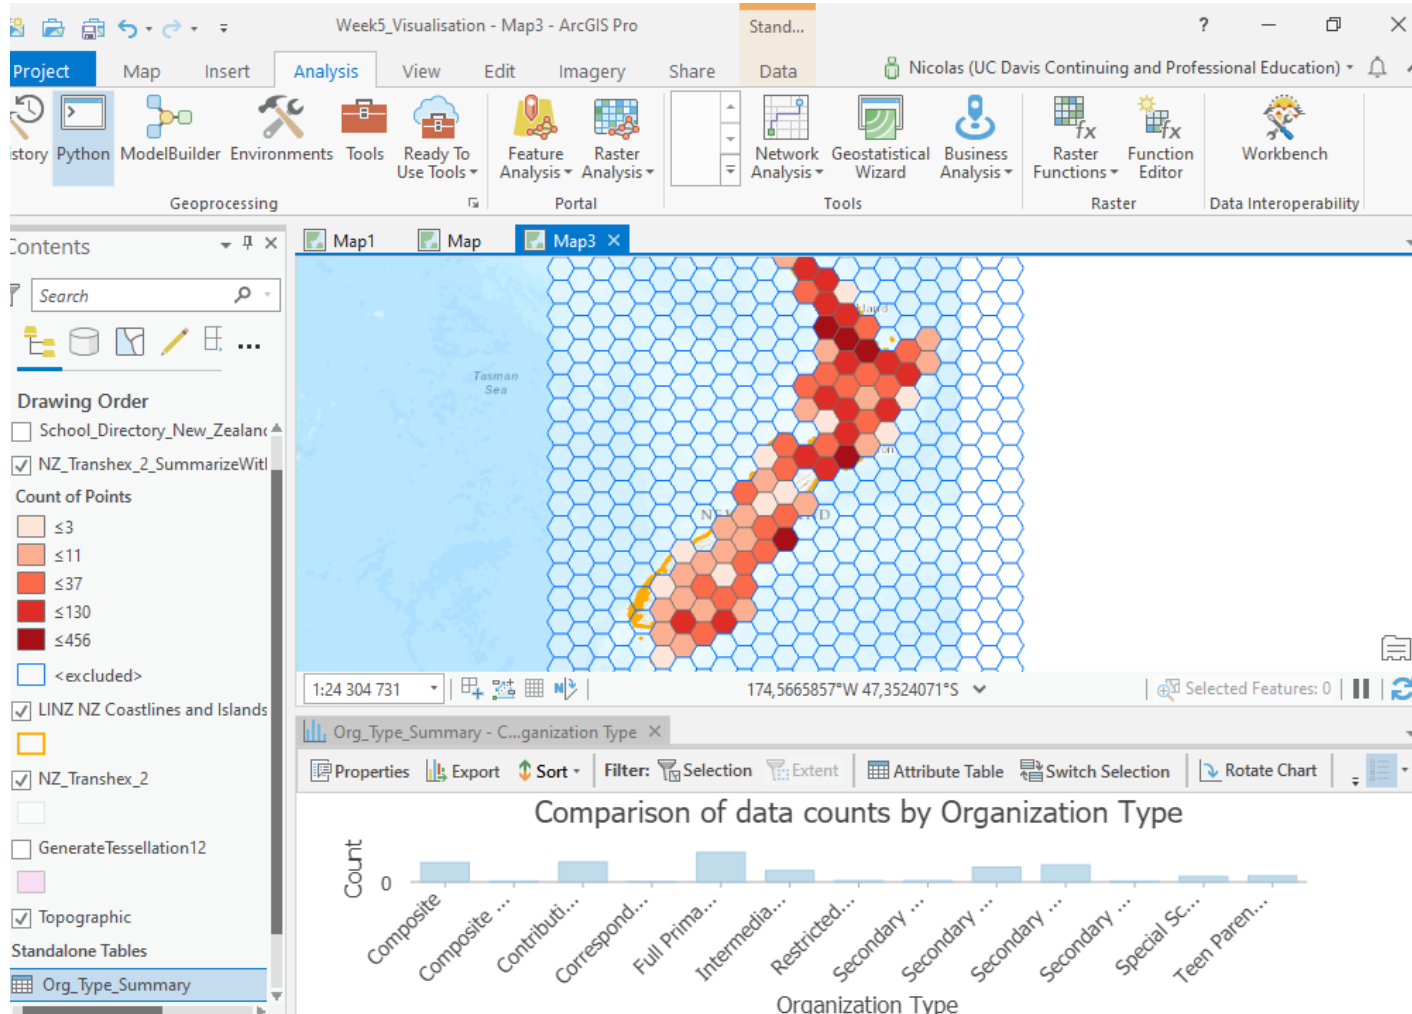

- Coordinate system: WGS 1984 Web Mercator
- COVID-19 cases count normalized by equal area cartogram visualisation
- Color ramp of Geometric Interval with 7 classes

Tessellation shapefile downloaded from:

<https://www.esri.com/arcgis-blog/products/arcgis-pro/analytics/how-to-electo-cubogram/?rmedium=redirect&rsource=blogs.esri.com/esri/arcgis/2017/07/17/how-to-electo-cubo-gram>

Utilization of Hexbins to create a descriptive summary of New-Zealand

- School organization in New-Zealand
- Ramp color and hexagon show the diversity of school organization inside both islands
